Mr. Steib made it known that attorney Kevin Kennedy provided the board with a memorandum regarding access to the rear of the building. The applicant chose to install an ADA chairlift to allow handicap access to the building, however this lift cannot accommodate a stretcher or a gurney, as was requested by the board. The applicant is also proposing to build a platform with 5-6 steps leading up to it. The platform will be large enough to accommodate a stretcher or gurney. The applicant was seeking clarification as to whether the ADA equipment must be large enough to accommodate a stretcher or gurney, or just the entrance to the building. Mr. Kennedy was present on behalf of the applicant and made it known that the entrance to the building will be ADA compliant, however a stretcher will need to be carried up 5 or 6 steps. Dr. Cetron asked how big the lift will be, Mr. Kennedy answered 36x54. Dr. Cetron stated that 5 steps is manageable with a stretcher. Mr. Steib asked if this was the concession of the board, it was. Mr. Kennedy asked Dr. Cetron to confirm that 6 steps would also be manageable, Dr. Cetron confirmed that it would be.

Attorney Chad Warnken was present on behalf of the applicant. Mr. Warnken made it known that the current owner is a new owner who purchased the property at foreclosure. Mr. Warnken stated that the new owner has uncovered new construction issues and is now asking for a third one-year extension. Dr. Cetron made it known that it has been four years since the application was approved, and it is his opinion that the applicant should have to come back to the planning board, or re-notice. Mr. Steib advised the board to consider whether there have been any changes in zoning, any changes in the neighborhood, or any circumstances which would make what was granted previously no longer appropriate. Mr. Warnken had indicated that there have not been any of these changes. Mr. Neff asked if there was a time frame. Mr. Warnken stated that this will be the last request, if the project can’t be done then the applicant will come back to the Planning Board for a new application. Mr. Colangelo made it known that the prior owner was operating the proposed bed and breakfast as a sort of “hall”, which would probably involve parties, alcohol, and a lot of trash. Mr. Colangelo asked if the new owner was still intent on operating the property as a bed and breakfast. Mr. Warnken answered that yes he is, and he is trying to be a good neighbor. Mr. Colangelo stated that extending the application for a year may help to solve some of the problems which have come
Mr. Caccamo asked why it has been so difficult to complete the project. Mr. Warnken answered that new construction issues have been discovered. Mr. Caccamo expressed concerns about traffic, and Dr. Cetron confirmed that the property has a large parking lot.

The property is undersized with 7’ set backs on either side, which the Planning Board granted a variance for. There is an existing shed at the rear of the property which is too close to the side and rear yard.

At 8:10 Ms. Drew arrived.

Basement/Cellar Sub Committee Discussion

Mr. Colangelo made it known that the Basement/Cellar Subcommittee had proposed recommendations for the council for the basement/cellar distinction. Mr. Pepe made it known that there have been a lot of applications where basement versus cellar has come up. The subcommittee believes that the 50% threshold distinguishing between the two may be part of the problem, so they are proposing to change the 50% threshold to a 30% threshold. The façade of the front of the lower level will only be considered a cellar if no more than 30% of it is above grade. Dr. Cetron stated that if it is not a cellar, it’s a basement, there is no more in between. He believes this simplifies things. Mr. McGoldrick stated that he believes this gives clarity to the applicant, and there is now math to do. Mr. Pepe made it known that Mr. Caccamo has suggested making a check list for applicants, if the ordinance is passed. Dr. Cetron made it known that the subcommittee made sure that the proposed recommendations do not conflict with the flood zone ordinance. Mr. Rohmeyer made it known that the “predevelopment grade” definition needs to be cleaned up, and asked if 75% referred to out of the ground, or below the ground. Mr. Pepe confirmed out of the ground. Mr. Rohmeyer stated that most cellars are non-habitable, and asked what the vision for the use of a cellar is. Dr. Cetron and Mr. Pepe confirmed habitable. Mr. Rohmeyer asked the subcommittee to clarify that a cellar is defined as a story. Dr. Cetron confirmed that a story is a story, with the exemption of one cellar. Mr. Pepe wondered if “façade” is the correct word to use, and stated that he assumed anything that is exposed is façade. The subcommittee asked Mr. Steib and Mr. Rohmeyer to review the proposed ordinance and decide what the correct word would be. A detailed discussion about the subcommittee’s intent followed. Mr. Steib recommended supplementing the proposal with a schematic.

At this time Mr. Fligor announced that this would be his last Planning Board meeting, as he has been hired as the new Harbor Manager. He made it known that he will be resigning from the Planning Board and the Council. Mr. Fligor thanked the board and made it known that he is very proud of them. The board wished Mr. Fligor well and made it known that he will be missed, and he was a pleasure to work with.

Adjournment

There being no further business to come before the Board, Mr. Colangelo asked for a motion to adjourn the meeting.
