Questions and answers regarding the Swift911 Program

What is Swift 911?

Swift 911 is a computerized notification system that can be used to notify you of an emergency situation, such as a severe storm or a dangerous situation in our harbor.

How does Swift911 work?

Each boat owner in the Atlantic Highlands Municipal Harbor will receive either a phone or e-mail message with the emergency alert. You may also receive both types of notifications if you wish.

If I do not have internet access can I sign up?

Yes, you can come to the harbor office and complete the form for phone notifications.

Can I take my name out of the system at a later date?

Yes, simply by going to the harbor web site, clicking on the Swift911 icon and selecting the remove button or by notifying the harbor office in writing.

If I am an Atlantic Highlands resident and have already signed up for the emergency notification, do I have to sign up again for the Harbor notifications?

Yes. The notifications from the Harbor will be specifically for information regarding the Harbor and the notifications from the Borough will be for different type of emergency notifications.
